

RetailPulse — Management Summary

RetailPulse generated approximately **₹3.24 million in revenue** across the six-month period after cleaning the order data.

Mumbai generated the highest revenue at approximately **₹741.5K**, while **Electronics** was the strongest category at approximately **₹1.39 million**.

Weekdays generated substantially more total revenue than weekends because there were more orders, although the **average weekend order value was higher**.

The analysis found **no meaningful relationship between discount levels and quantity sold**, with a correlation of approximately **0.003**.

At the individual product level, **Smart Watch** was the highest-revenue product, generating approximately **₹542.9K**.

Overall, the results highlight Electronics, Mumbai, and high-performing products such as Smart Watch as important contributors to sales during the period.
